## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-5, 10-11 and 18-20, drawn to method for maintaining privacy.

Group II, claim(s) 6-7 and 13-14, drawn to method for maintaining privacy.

Group III, claim(s) 8-9 and 15-16, drawn to method comprising maintaining privacy.

Group IV, claim(s) 12 and 17, drawn to system for maintaining privacy.

2. The groups of inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

3. Groups I-IV lack unity of invention because even though the inventions of these groups require the technical feature of the doubly encrypted content. This technical feature is not a special technical feature as it does not make a contribution over the prior art in view of Schneier (Applied Cryptography, Protocols, Algorithms and Source Code in C, Second Edition, ISBN 0-471-12845-7, Copyright © 1996 by Bruce Schneier, Published by John Wiley & Sons, Inc., pp 39-40). Schneier teaches the use of multiple

signatures, therefore the shared technical feature lacks novelty and an inventive step in view of Schneier.

4. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

5. The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse. Traversal must be presented at the time of election in order to be considered timely. Failure to timely traverse the requirement will result in the loss of right to petition under 37 CFR 1.144. If claims are added after the election, applicant must indicate which of these claims are readable on the elected invention or species.

6. Should applicant traverse on the ground that the inventions have unity of invention (37 CFR 1.475(a)), applicant must provide reasons in support thereof. Applicant may submit evidence or identify such evidence now of record showing the inventions to be obvious variants or clearly admit on the record that this is the case. Where such evidence or admission is provided by applicant, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
